Look 10lbs lighter in 10 seconds*

FIT GUIDE

THE MIRACLE

Who is Miraclesuit for?

The Miraclesuit collection is designed to appeal to women of all ages and sizes—there is something for everyone and every body. When a woman wears her Miraclesuit, she feels confident and beautiful: a celebration of herself.

Design and inspiration

At Miraclesuit, we believe in curves.

The Miraclesuit heritage of fit, form and function continues to be the basis of the collection. With an emphasis on strong print development, Miraclesuit's updated silhouettes utilize innovative construction and design. A collection of coordinating cover-ups completes a woman's destination wardrobe.

What's the Miracle?

Miraclesuit is the swimsuit that comfortably contours, shapes, slims and firms the body without constricting movement so a woman can spend more time relaxing and less time worrying about how she looks in a swimsuit.

Miraclesuit begins with our unique and innovative fabric, Miratex[®], which has over twice the amount of LYCRA[®] and three times the holding power than any other swimsuit. When a woman puts on a Miraclesuit, she appears 10 lbs. lighter in 10 seconds[®]—the amount of time it takes her to slip it on.

MIRACLESUIT

MIRATEX[®]

The technology behind the Miracle

Miratex is a specially engineered hybrid fabric with the truly unique ability to shape a woman comfortably. The exclusive combination of high stretch and high modulus (shaping power) not only delivers the 10 lbs. lighter in 10 seconds[®] promise to the consumer when the suit is first put on, but the fabric and fit also deliver the promise all day long, whether she is lounging, swimming, or even practicing beach yoga.

The curves are in the curves. What this means is that the shape of the stretch and modulus curves of the fabric perform the miracle of shaping the body. Miratex fabric is engineered to have shaping power at the fit point, while still having at least 150% stretch in all directions to become a true second skin. The power at the fit point does the shaping, while the high stretch allows for freedom of movement to comfortably perform all activities.

With the fibers used and the hybrid construction, Miratex fabric absorbs 48.3% less water in the first fifteen minutes than standard swimsuit fabrics. Miratex starts drier and stays drier. The chlorine resistance is greatly enhanced when combined with LYCRA[®], further extending the durability of a Miraclesuit.

GENERAL TIPS

Choosing the right size

When purchasing a Miraclesuit for the first time, many customers order a swimsuit in their usual size for the most comfortable and slimming fit. Sizing up is suggested depending on your fit preference, if you are between sizes or if you prefer a less snug fit.

Getting into your swimsuit

Step into the leg openings and shimmy your swimsuit up, making sure to gather and pull from the bottom of the suit up (pulling from the top or straps will make this process much more cumbersome). Place the straps over your shoulders and adjust accordingly. It takes a few extra steps to get into a Miraclesuit, but once you're in, you'll appreciate the Miracle.

Caring for your swimsuit

After each use, hand wash your Miraclesuit in cool, clear water and hang to dry. Do not use chlorine bleach. Do not iron or tumble dry. Following these instructions will help extend the lifespan of your swimsuit so you can enjoy it even longer.

Investing in a quality brand

Consider swimwear as an investment and an essential in your wardrobe. When buying a swimsuit, always choose a good quality product that will stand the test of time, performance and durability.

HOW TO MEASURE

Bust Measure around the body, across the most protruding part of the breast (apex).

Hips Measure around the body, across the hips and 4" below the navel.

Waist Measure around the body at the narrowest part of the waist.

Torso Measure between the legs, over the apex of the breast and up to meet the other end of the measuring tape at the top of the shoulder.

MISSES SIZE GUIDE

SIZE	8	10	12	14	16	18
BUST	37"	38 1/2"	40"	41 1/2"	43"	44 1/2"
WAIST	28 1/2"	30"	31 1/2"	33"	34 1/2"	36"
HIPS	39 1/2"	41"	42 1/2"	44"	45 1/2"	47"
TORSO	61"	62 1/4"	63 1/2"	64 1/2"	66"	67 1/2"

FINDING YOUR FIT

If a suit doesn't fit right, it won't ever look or feel right!
Always begin with the right size.

Straps Can you fit your thumb comfortably under the strap? If you can't, the suit is too small. If the straps slide off the shoulders or feel loose, try a smaller size or a different style.

Back Check coverage. Cuts, bulges or riding up? Try a different style or larger size. Sagging or drooping? Try a smaller size.

Bra The breasts should fill out the bra. If there's gapping or lack of support, try a smaller size or a different style. The right suit will give support, separation and coverage.

Crotch Check coverage. Cuts, bulges or riding up? Try a different style or larger size. Sagging or drooping? Try a smaller size.

Underarm Check coverage. Cuts, bulges or riding up? Try a different style or larger size. Sagging or drooping? Try a smaller size.

Derriere Check coverage. Cuts, bulges or riding up? Try a different style or larger size. Sagging or drooping? Try a smaller size.

THE REAL TEST IS TO MOVE...

Lift arms, twist, bend, squat, jump up and down! Make sure the suit is where it's supposed to be and still feels good.

BRA SUPPORT

Miraclesuit's advanced bra construction caters to every woman no matter her size or the type of support she needs.

Soft Cups

These cups are made from a soft foam material that is molded to shape and fit a woman's breasts. While providing support, they also give a woman additional coverage and help to conceal this area. The cups in the suit should be large enough to prevent breasts from bulging or spilling out over the neckline or armhole edges, but not so large that there is wrinkling or gaping in this area.

Underwire

Underwires are very popular for fit, lift, shaping and support. An underwire bra will move when you move, so there is no jabbing or gouging. The best underwire for you is one that encircles your breast, giving you a rounded and defined look.

Molded Foam Bra

The molded bra construction offers the ultimate support, lifting and shaping with an underwire built in. No more bulky wire construction or poking through after a couple of wears. Foam cups extend up through the shoulder straps for added comfort and cushion to relieve stress and support weight.

Fuller Bust Collection

Miraclesuit offers soft cups, underwire or molded bra cups with DD and DDD sizing options with added support for larger, fuller busts. Fuller bust swimsuits are engineered with details like power linings, wider padded straps and higher armholes to contain the bust and provide long lasting, comfortable support.

The neckline is something to keep in mind when selecting a swimsuit for fuller busts. V-necklines flatter a larger bust by drawing the eye up and elongating the figure while allowing you to show off cleavage if desired. Higher necklines support larger busts while providing a sleek, modern look and added sun protection for the chest. Swimsuits that wrap diagonally across the chest help to minimize the bust area.

FULL FIGURED WOMEN

Fuller figured women should look for suits with a bit more coverage in their area of concern. Miraclesuit offers all-over body control that slims, shapes and flatters the body. The control is designed and engineered into the suit without using uncomfortable girdle linings.

If you are looking to minimize fuller hips, find a suit that flatters your legs, gives you more coverage or draws the eye away from the area altogether, such as a skirt or short swimsuit bottom. A two-toned swimsuit or a suit with bright colors on top and darker on the bottom will naturally detract from the hips and draw the eye upward.

WOMEN SIZE GUIDE

SIZE	16W	18W	20W	22W	24W
BUST	47"	48 1/2"	50 1/2"	52 1/2"	54 1/2"
WAIST	42 3/4"	44 1/4"	46 1/4"	48 1/4"	50 1/4"
HIPS	48"	50"	52"	54"	56"
TORSO	65"	66 1/4"	68 1/2"	70 1/4"	72"

BRA CUP SEPARATES

Miraclesuit now offers separates with true bra cup sizing, constructed with full underwire and molded cup support, as well as concealed hook and eye adjustable bra closure. Use our Bra Cup Size Guide to find the right fit for you.

MIRACLESUIT

FINDING YOUR BRA CUP SIZE

How to measure in 3 easy steps:

- 1. Band:** Measure above your bust, under your arms and around your back to get your band size.
- 2. Cup:** Measure the fullest part of your bust, keeping the tape in place and not too snug. Round up to the nearest inch to get your cup measurement.
- 3. Calculate:** Subtract your band size from your cup measurement.

Example: If band measures 34" and cup measures 37", $37" - 34" = 3"$ difference. This indicates cup size 3" or C cup.

Team your cup size with your band size and you now have your bra size!

BRA CUP SIZE GUIDE

SIZE	A	B	C	D	DD	DDD
INCHES	1"	2"	3"	4"	5"	6"
32	33	34	35	36	37	38
34	35	36	37	38	39	40
36	37	38	39	40	41	42
38	39	40	41	42	43	44
40	41	42	43	44	45	46
42	43	44	45	46	47	

This is the difference between your band and bust measurements
 Example: Bust 37" - Band 34" = 3" (C cup)
